#### **SECTION 4. FIRST AID MEASURES**

General advice Move non-essential personnel away from treatment area, spill, or dangerous area.

> Have this safety data sheet available for emergency/medical responders. Symptoms of exposure may appear several hours later. Do not leave the victim unattended.

If inhaled Remove to fresh air. Treat symptomatically. Get medical attention if symptoms occur.

If unconscious, place in recovery position and seek medical advice.

Immediate medical treatment is necessary as untreated wounds from corrosion of the

skin heal slowly and with difficulty.

In case of skin contact Wash off immediately with plenty of water for at least 15 minutes.

Remove contaminated clothing and shoes. Wash contaminated clothing before re-

use.

Small amounts splashed into eyes can cause irreversible tissue damage and

Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes.

Continue rinsing eyes during transport to hospital. Remove contact lenses.

Protect unharmed eve.

Keep eye wide open while rinsing.

If eye irritation persists, consult a specialist.

Keep respiratory tract clear.

DO NOT induce vomiting unless directed to do so by a physician or poison control

centre.

If swallowed Never give anything by mouth to an unconscious person. If symptoms persist, call a

physician.

Take victim immediately to hospital

If potential for exposure exists refer to Section 8 for specific personal protective

Protection of first aiders equipment.

Notes to physician Treat symptomatically. Symptoms may be delayed.

Effects are immediate and delayed.

**Most important** symptoms and effects, both acute and delayed

In case of eve contact

Symptoms may include blistering, irritation, burns, and pain. Effects are dependent on

exposure (dose, concentration, contact time).

Causes severe skin burns and eye damage. Review section 2 of SDS to see all

potential hazards.

## SECTION 5. FIREFIGHTING MEASURES

Suitable extinguishing

media

Alcohol-resistant foam Carbon dioxide (CO2)

Dry chemical

Unsuitable extinguishing

media

Specific hazards during

firefighting

Do not allow run-off from firefighting to enter drains or water courses. This product is combustible and can intensify or help spread a fire.

Do not use water jet as an extinguisher, as this will spread the fire.

Decomposition products may include the following materials:

Carbon dioxide (CO2) Carbon monoxide

**Hazardous combustion** Smoke

products

Nitrogen oxides (NOx)

Sulfur oxides

Special protective equipment for firefighters Firefighters are to wear self-contained breathing apparatus if in risk of

exposure to fumes or products of combustion.

Specific extinguishing methods

Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. Use a water spray to cool fully closed containers. In the event of fire and/or explosion do not breathe fumes. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. For safety reasons in case of fire, cans should be stored separately in closed containments.

## **SECTION 6. ACCIDENTAL RELEASE MEASURES**

Personal precautions, protective equipment and emergency procedures

Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Avoid inhalation, ingestion and contact with skin and eyes. When workers are facing concentrations above the exposure limit, they must use appropriate certified respirators. Ensure cleanup is conducted by trained personnel only. Refer to protective measures listed in Sections 7 and 8.

**Environmental precautions** 

Do not allow contact with soil. Prevent runoff to waterways, drains, stormwater or sewer.

Methods and materials for containment and cleaning up

Stop leak if safe to do so. Use only non-sparking tools. Contain spillage, and then collect with non-combustible absorbent material e.g., sand, earth, diatomaceous earth, vermiculite, and place in container for disposal according to local / national regulations (see Section 13). Flush away traces with water. For large spills (>5L), dike spilled material or otherwise contain material to ensure runoff does not reach a waterway.

#### SECTION 7. HANDLING AND STORAGE

Advice on safe handling

Conditions for safe storage

Avoid exposure - obtain special instructions before use. Avoid contact with skin and eyes. For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Do not breathe vapours or spray mist. Provide sufficient air exchange and/or exhaust in work rooms. To avoid spills during handling keep bottle on a metal tray. Dispose of rinse water in accordance with local and national regulations.

Do not store near strong alkalis. Combustible material: store away from naked flames, heat sources and ignition points. Keep out of reach of children. Keep container tightly closed in a well-ventilated place. Store in suitable labelled containers. Observe label

precautions.

Electrical installations / working materials must comply with the technological safety standards.

## SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Effective exhaust ventilation system. Maintain air concentrations below **Engineering measures** occupational exposure standards.

Personal protective

Respiratory protection

equipment

**Hand protection** 

Hygiene measures

Avoid breathing mists or sprays. Use respiratory protection unless adequate local exhaust ventilation is provided, or exposure assessment

demonstrates that exposures are within recommended exposure guidelines. If working in a poorly ventilated area and exposure limits may

be exceeded, wear a respirator with ABEK-P2 cartridge.

Wear chemical resistant gloves e.g. nitrile, neoprene, butyl natural

rubber.

Eye protection Safety glasses with side-shields, face shield.

Skin protection Wear protective clothing and footwear.

> Handle in accordance with good industrial hygiene and safety practices. Remove and wash contaminated clothing before re-use. Wash face, hands and any exposed skin thoroughly after handling. Provide suitable wash facilities for quick drenching or flushing of

the eyes and body in case of contact or splash hazard.
